

Downloading Library Ebooks on your Amazon Kindle: A Step-by-Step Guide

1. Make sure your Kindle is powered on and connected to a wireless network.
2. Go to www.amazon.com and log in to your Amazon account (If you've used Amazon recently on your computer, you may already be signed in).
3. Next, visit the Overdrive site at dbooks.wplc.info and click on the **Sign In** link in the upper right corner.
 - Using the pull-down arrow, select your library system (South Central Library System) from the list.
 - Type in the full bar code from your library card and click the **Sign in** button.
4. Browse for currently available ebooks by clicking on the **Advanced Search** link under the search box in the upper-right corner of the screen.
5. Use the pull-down arrow across from the words *All Formats* to select *Kindle Book*. Check the **Only title with copies available** box on the bottom of the screen and then click **Search**.
6. You should only see the covers of ebooks that are currently available (Hint: You can tell a book is currently available when the book icon in the upper-right corner of the book cover is black ). If the book icon is gray , this means that the ebook is not currently available and must be placed on hold). When you've found a book you'd like to download, click on the book's cover.
7. To change your lending period, click on the orange **Account icon**  and then the **Settings** link and select 7, 14, or 21 day loan periods for ebooks.
8. Click on the orange **Borrow** button and you will be taken to your bookshelf where you'll see the cover of the book you just checked out.
9. Click on the pull-down arrow on the orange **Download** button and click to select the box next to *Kindle Book*. Then click the **Confirm and Download** link.
10. You will be taken to Amazon's site where, if you are already signed in to your Amazon account (see Step 2), you will see the cover image of the book and a yellow **Get Library Book** button on the right side of the screen
 - Note: before clicking on the **Get Library Book button**, make sure your Kindle device is listed in the **Deliver to:** box. If you have more than one device on your Amazon account, use the pull-down menu to select the appropriate device.
11. Click on the **Get Library Book** button. The library book will be delivered wirelessly to your device. Depending on your network, this can take anywhere from a few seconds to a few minutes.
12. In order for the book to appear on your Kindle, you must Sync your device.
 - If you have a Kindle Fire, tap the small gear icon at the top-right and tap Sync. Your book should now appear in your Carousel.

- If you have a basic Kindle or Kindle Touch, select Settings and then select Sync and Check for Items.

Placing Holds and Checking out Items on Hold

If an ebook is not available for immediate download you may place a hold on it. Simply tap the cover of the ebook and tap the orange **Place a Hold** button. The first time you place a hold, you will be asked to enter your email address twice. Subsequently, Overdrive will remember your email address.

When the ebook becomes available, you will receive an email notification. You have 3 days from the day of notification to check out the item before your hold expires. To check out and download a book that you have on hold:

1. Go to dbooks.wplc.info and click the **Sign In** link in the upper-right corner of the screen.
2. Select your library system (if necessary), enter your library card number, and click the **Sign In** button.
3. Click the orange **Account icon**  and then click **Holds**.
4. Click on the orange **Borrow** button next to the cover of the book and follow steps 9-12 on the front of this handout.

Downloading Kindle Ebooks via USB when Wireless Download is Not Available

If your Kindle is not Wi-Fi capable or you do not have wireless Internet, you will need to download Kindle ebooks via a USB cable, which is included with all Kindle devices **except** the Kindle Fire (a cable can be purchased separately). Additionally, certain publishers do not allow for wireless transfer of their titles. These titles must be transferred via USB.

1. Make sure your Kindle is powered on and plugged into a USB port on your computer.
2. Follow Steps 2 – 9 on page one of this hand out.
3. When you've arrived at the Amazon site, click on the drop-down menu under the words **Deliver To:** and select **Transfer via Computer** and click the **Get Library Book** button.
 - Note: If wireless transfer is not available because of publisher restrictions, you will see only a link that reads [Transfer via USB](#)
4. Select the device to which you want to transfer the ebook from in the drop-down menu and click the **Continue** button.
5. A dialog box will appear. Select **Save File** and click **OK**. The file will be saved to the default location on your computer (usually the Downloads folder). The file name will be the title of the book and the file extension .azw or .azw3.
6. If you haven't already, connect your Kindle to your computer with USB cable. Your computer will ask you what you want it to do. Close this box or select **Take no Action**
7. You have several options for moving the file from the folder on your computer to your Kindle. The easiest way to transfer the file is to open the containing folder, right click on the Kindle ebook file and select **Copy to Folder...** from the menu.
8. Select your Kindle Device from the list of locations and select the **Documents** folder within the Kindle. Click the **Copy** button to copy the file to your Kindle.
9. Unplug your Kindle from your computer. If you have a Kindle Fire, the new ebook should appear in your Carousel. On all versions of the Kindle, the ebook should appear on your Home screen.
